In the middle of the 20th century, Erik Erikson proposed a stage theory of psychosocial development. The theory outlines eight stages that take place throughout the human life span. The fifth stage, which takes place during adolescence, is a period of identity exploration and development.

## Emerging Adulthood: Defining the Developmental Stage

The prevalence of substance use disorders is highest during adolescence; however, many adolescents experience a natural resolution of their substance use by early adulthood, without any formal intervention. Something appears to be unique and adaptive about the adolescent brain. In this Review, we
