Stripe API Reference

As a simple example, Facebook has a public API that allows third-party applications to integrate Facebook. This means that a developer, for example, can allow you to log into an application using your own Facebook account. The term “integrate” means that an application is using a particular API. Adding Facebook is just one example.

API Tutorial for Beginners - CloudRail

Here are some examples. Also, check out aglio, the API blueprint renderer. 6. Swagger – simple and powerful interface to your API. Lots of automation, API tooling, and even client SDK generation and discoverability. Check out the live demo. 7. Calamum – generates REST API documentation from a JSON file. It has a twitter template and a bootstrap template.

Top 10 Free Templates for API Documentation | TechSlides

Most good examples of API documentation use a dynamic layout as it makes navigation easier for users than static layouts when looking for specific topics in extensive documentation. Starting with a scalable dynamic layout will also make sure you can easily expand your docs, as needed.

The Ten Essentials for Good API Documentation – A List Apart

Provide examples in every single object which your API is supposed to return, as well as examples of parameters that users can add for a successful API call. Here’s another great documentation example of Stripe, and how they details error responses. Another great example of good documentation of requests and responses is Instagram.
