Innervation. There are two branches or divisions of the autonomic nervous system (ANS): the sympathetic and parasympathetic. Both branches innervate most organs in an arrangement called dual innervation. The parasympathetic division is most active during rest and stimulates digestive activities.

neurons that release acetylcholine include (1) all sympathetic and parasympathetic preganglionic neurons, (2) all parasympathetic postganglionic neurons, and (3) a few sympathetic postganglionic neurons. Most sympathetic postganglionic neurons release the neurotransmitter norepinephrine (NE).

Chapter 29- Introduction to the
Autonomic Nervous System ...

The autonomic nervous system (ANS) is responsible for involuntary control of the body, usually for the sake of homeostasis (regulation of the internal environment).

Online Library Chapter 11

Autonomic Nervous

Sensory input for autonomic functions can be from sensory structures tuned to external or internal environmental stimuli.

12.1 Basic Structure and Function of the Nervous System ...

involuntary responses the brain controls without the need for conscious thought.

Online Library Chapter 11

Autonomic Nervous

The autonomic nervous system (ANS) works using a balance of the sympathetic and parasympathetic nervous systems that regulate the body ' s involuntary functions, including heart rate, respiratory rate, digestion, and sweating.
