Wave. A disturbance in matter that carries energy from one place to another.

EXAMPLE: In a wave pool, the waves carry energy across the pool. Medium. The material through which a wave travels.

EXAMPLE: Solids, liquids, and gases all can act as a medium. In a wave pool, waves travel ...

17.3 Behavior of Waves; 47 Reflection.
Reflection occurs when a wave bounces off a surface that it cannot pass through. Reflection does not change the speed or frequency of a wave, but the wave can be flipped upside down. 48 Refraction.
Refraction is the bending of a wave as it enters a new medium at an angle.
