Sovereignty is a key factor to consider when studying the Mexico-United States relationship. During most of the twentieth century, as a result of the new character of the Mexican post-revolutionary regime, there was a decoupling between the state's maximalist discourse on sovereignty, and its practice. Sovereignty as an undifferentiated whole does not exist; it should instead be disaggregated into the myriad issue areas in which it is constantly negotiated. Focusing on a tripartite classification relating to the construction of Mexico's sovereignty towards its northern neighbor since 1920, this volume illustrates how Mexico's sovereignty has varied not only according to the times, but also according to the issues at stake. In doing so, Arturo Santa-Cruz comprehensively

covers a variety of issues in the bilateral agenda such as drug trafficking, electoral observation, human rights, investment, migration, security, and trade, as well as some defining moments in the relationship, such as the 1923 US granting of recognition to the Mexican post-revolutionary regime, the 1938 oil nationalization, the 1982 debt crisis, and the 1995 financial bailout. This linkage, a highly topical subject in the twenty-first century world, is concretely studied by putting the abortive Finnish revolution of 1917-18 into a long historical and a broad comparative perspective.

Argues for an original, unorthodox conception about the relationship between globalization and contemporary nationalism.

While the prevailing view holds that nationalism and globalization are forces of clashing opposition, Sabanadze establishes that these tend to become allied forces. Acknowledges that nationalism does react against the rising globalization and represents a form of resistance against globalizing influences, but the Basque and Georgian cases prove that globalization and nationalism can be complementary rather than contradictory tendencies. Nationalists have often served as promoters of globalization, seeking out globalizing influences and engaging with global actors out of their very nationalist interests. In the case of both Georgia and the Basque Country, there is little evidence suggesting the existence of strong, politically organized nationalist opposition to globalization. Discusses why, on a broader scale, different forms of nationalism develop differing attitudes towards globalization and engage in

different relationships. Conventional wisdom suggests that sub-state nationalism in the post-Cold War era is a product of globalization. Sabanadze's work encourages a rethinking of this proposition. Through careful analysis of the Georgian and Basque cases, she shows that the principal dynamics have little, if anything, to do with globalization and much to do with the political context and historical framework of these cases. This book is a useful corrective to facile thinking about the relationship between the 'global' and the 'local' in the explanation of civil conflict. Neil MacFarlane, Lester B. Pearson Professor of International Relations and fellow at St. Anne's College, Oxford University and chair of the Oxford Politics and International Relations Department.
