Chapter 4 tissues and membranes Flashcards | Quizlet

Chapter 4: Tissues and Membranes: Aims at explaining the major categories of tissues and their functions. It helps

Online Library Chapter 4 Tissues And Membranes

understand the difference between endocrine and exocrine glands. Chapter 10: The Endocrine System: Aims at explaining the endocrine glands, the various hormones they produce and their functions. Chapter 12: The Heart: Explains the location, structure, functions of the heart.

Chapter 4 Tissues and Membranes Aims at explaining the ...
Terms in this set (118) Four types of tissues. Epithelial, connective, muscle, nerve. Group of cells with similar structure and function. Contributes to the functioning of an organ. Tissue. Sheets of tissue--each ____ has specific locations and function. membrane.

Chapter 4: Tissues and Membranes | Biology Flashcards ...

Online Library Chapter 4 Tissues And Membranes

Chapter 4: Tissues Membranes Overview of Tissues Tissues: 2 or more cells put together to perform a common function. o 4 Basic Types of Tissues: 1. Epithelial 2. Connective 3. Muscle 4. Nervous Epithelial Tissue Epithelial tissue is a sheet of cells that covers a body surface or lines a body cavity. It can occur in 2 forms: covering and lining, or glandular epithelium. o Covering and Lining Epithelium: forms the outer layer of the skin.
