Applicants to the Mathematics course who take A Level Mathematics in Year 12, and A Level Further Mathematics and one other A Level subject in Year 13 won't usually need to take another A Level in Year 13. 2 Such students may be required to achieve A\* in the two subjects taken in Year 13 (even if they achieve A\* in Mathematics), and should be enhancing their subject knowledge through wider engagement beyond their A Levels. Contact a College admissions office for further advice.

Mathematics | Undergraduate Study

Students are advised to retain course outlines for future use in support of applications for employment or transfer of credits Course Description: This course extends the mathematics ideas taught in Introduction to Technical Mathematics through advanced mathematics problems needed for mechanical engineering programs.

Not only instructors can set course goals, develop student learning objectives, but they can also create and align assessment plans, as well as establish a schedule for the course. Course outlines give the student a brief idea on what subjects he or she will be taking over the next couple of years by setting course goals and student learning plan outcomes. The syllabus also explains to students about what expectations lies ahead of them and provides a timeline of these expectations.
