comes from, where it goes, and how it gets  
stored.

---

How to Make a Data Flow Diagram | Lucidchart

A data flow diagram (DFD) represents graphically a flow of data within a system. It illustrates how data is input and output from the system. It also shows destinations, storage, and sources of the information in the system. In other words, DFD represents the information flow as well as where data comes from, where data goes and how it is stored.
