Distinguished authors detail cross-cultural issues affecting youngsters, including parenting practices, gender role socialization, risk and resilience in childhood, and more. The text challenges existing beliefs about childhood development, offers current research on childrearing and socialization practices in diverse cultures, and examines social and educational policies as they relate to children and adolescents. Socialization practices within families, communities, and educational settings are included. This volume, which includes both field-based and experimental research, will appeal to practitioners, scholars, and students in the fields of child psychology, cross-cultural psychology, anthropology, sociology, child and family studies, and social work.

The Art of Childhood and Adolescence is composed of completely new research on the development of representational thinking from infancy through to adolescence. It makes an important contribution to the theory of children's development and to practitioners' understanding, as well as suggesting new paths of inquiry. The book draws on highly detailed longitudinal studies, conducted over 24 years (20 in London and 4 in Singapore). Line drawings and photographs are used to illustrate important concepts. Matthews, highly respected internationally, also sheds light on current debates, such as the opposition of culturally specific and universal development in children the world over.
