[User Stories provide benefits for all kinds of Agile Teams](#) (image by Andrew McKay) In Kanban, teams accumulate Stories in a Backlog and then run them one by one to support the work-in-progress flow. This helps to constantly stay on track and improve development team KPIs. Scrum (which we usually prefer at Stormotion) teams also love User Stories.

[How to Write a Good User Story: with Examples & Templates](#)

In Agile methodology 'User Story' is a unit of work that should be completed in one sprint. Smaller than that it's a task, more than week (s) of work is Epic or Theme. Check-out our previous post for 25 example of user stories templates. The agile recommendation is to break down a set of user stories into smaller ones, containable into a single sprint duration, or ideally, a user story shouldn't last more than a week.

In DSDM projects, User Stories are recorded in the Prioritised Requirements List (PRL). This is the equivalent of a Product Backlog in other Agile approaches. 15.3.3 User Story - the Card. From the PRL, User Stories are often printed onto physical cards, for planning purposes and to help the Solution Development Team monitor progress.

[Chapter 15: Requirements and User Stories - Agile Business](#)

While user stories are plain and simple, requirements documents go into a lot of detail and take a fair amount of time to write. Requirements documents often contain things like executive summaries, scope, risks, and more. They set the level of quality for functionality, performance, and user experience.

[User Story vs Requirement - What's The Difference ...](#)

A user story is a requirement for any functionality or feature which is written down in one or two lines and max up to 5 lines. A user story is usually the simplest possible requirement and is about one and only one functionality (or one feature). The most commonly used standard format for a User Story creation is stated below:
