Written by experienced teacher and author Mike Benn, this student guide for Physics: · Helps you identify what you need to know with a concise summary of the content examined in the AS and A-level specifications · Consolidates understanding with exam tips and knowledge check questions · Provides opportunities to improve exam technique with sample answers to exam-style questions · Develops independent learning and research skills · Provides the content for generating individual revision notes

Developed for the new International A Level specification, these new resources are specifically designed for international students, with a strong focus on progression, recognition and transferable skills, allowing learning in a local context to a global standard. Recognised by universities worldwide and fully comparable to UK reformed GCE A levels. Supports a modular approach, in line with the specification. Appropriate international content puts learning in a real-world context, to a global standard, making it engaging and relevant for all learners. Reviewed by a language specialist to ensure materials are written

in a clear and accessible style. The embedded transferable skills, needed for progression to higher education and employment, are signposted so students understand what skills they are developing and therefore go on to use these skills more effectively in the future. Exam practice provides opportunities to assess understanding and progress, so students can make the best progress they can.
