[The docker run command is where we pick up the networking story. The most basic execution of an ASP.NET Core container looks something like this: docker run -p 32767:80 imagetorun -p 32767:80 is what 's called a port mapping. It maps port 80 on the container to port 32767 on the host. The host is the machine running Docker.](#)
