Discipline chapter approaches the field from a unique perspective and describes the seminal events that have been influential in shaping its evolution. This book presents major trends in theory and practice in the field, provides an overview of its intellectual development, and demonstrates how it has professionalized. The range from modernism to metamodernism is reflected from the perspective of accomplished scholars in the field, each of whom captures the history, environment, and development of a particular dimension of public administration. Taken together, the chapters leave us with an understanding of where we are today and a grounding for forecasting the future.

Intellectual traditions are commonly regarded as cultural variations, historical legacies, or path dependencies. By analysing road junctions between different traditions of public administration this book contests the dominant perspective of path-dependent national silos, and highlights the ways in which they are hybrid and open to exogenous ideas. Analyzing the hybridity of administrative traditions from an historical perspective, this book provides a new approach to the history of Public Administration as a scientific discipline. Original and interdisciplinary chapters address the question of how scholars from the U.S., Germany and France mutually influenced each other, from the closing years of the 19th Century, up until the neo-liberal turn of the 1970s. Offering a thorough analysis of the transatlantic history of Public Administration, the conclusion argues that it is vital to learn from the past, in order to

make public administration more realistic in theory, as well as more successful in practice. Advanced undergraduate and postgraduate political science scholars will find this to be a valuable tool in understanding the foundations of transatlantic Public Administration. This book will also greatly benefit researchers on comparative and transnational history with a keen interest in public administration.

The present Korean public administration and policy system has shown very significant differences compared to the system in 1970s. This book provides a comprehensive and holistic view on the development of Korean public policy and administration. Instead of dichotomizing the policy and administration, this book integrates two fields to provide a more holistic view on the Korean public sector. The book also attempts to overcome simplified

Discipline explanations on the developmental state theory. The book aims to explain who the key actors are during the post-democratization period, how the administrative systems reform, and what kinds of social problems are transformed into public policies. This explanation suggests that the role of government shifts from a dominant actor to an actor within a complex network governance. This book will be a useful reference to anyone who wishes to learn more about the experience of the Korean development and the role of administration and policy.

prehistoric cave-dwellers to twentieth-century administration. Viewpoints are varied to bring in the several levels and spheres of operation; namely, directional and personnel, organizational and technical, biographical and theoretical. The work is in two volumes. Volume One covers the main civilizations of the Middle East, India, China and the West up to the eleventh century A.D. Volume Two, continuing the same field, extends its scope to include the civilizations of pre-Columbian America, the colonial empire and international administration. At a time when the scope of public administration is continually expanding, and more research is being carried out into administrative problems, much can be learned from the administrative lessons of the past. Dr. E.N. Gladden, a retired civil servant, has designed this work to integrate a vast and diverse subject.

Strategies and priorities for the public sector in Europe The public sector in our society has over the past two decades undergone substantial changes, as has the academic field studying Public Administration (PA). In the next twenty years major shifts are further expected to occur in the way futures are anticipated and different cultures are integrated. Practice will be handled in a relevant way, and more disciplines will be engaging in the field of Public Administration. The prominent scholars contributing to this book put forward research strategies and focus on priorities in the field of Public Administration. The volume will also give guidance on how to redesign teaching programmes in the field. This book will provide useful insights to compare and contrast European PA with PA in Europe, and with developments in other parts of the world. Contributors: Geert
