The passive anti-theft system (PATS) is installed on every Ford Expedition at the factory. While some erroneously call this system the factory alarm, it really is not an alarm system. The PATS system will arm itself if someone attempts to start the vehicle with anything other than the PATS key programmed to that ...

How to Reset the Theft Protection in a Ford Expedition ...

Insert the key into the ignition and turn it on to the position where the accessories are activated but not the engine. The display of the car behind the steering will light up and will show the anti-theft light blinking or constantly lit. Leave the key in this position for at least 10 minutes. Check the anti-theft light again.

How to Reset Anti Theft System Ford? - Useful Guide to ...

There isn't a way to bypass the pats system. the only way to program pats key is at a ford/mercury/lincoln dealer and you need a minimum of 2 keys to do it. sorry but that is the only way.....unless you know someone who works at a ford dealer and has their own tester/computer

How Do I Bypass The PATS Antitheft System On My 1997 Ford ...

Press the button and hold it in until the alarm beeps one time. The LED light for the alarm should stop blinking, indicating the antitheft system is disabled. To reset the vehicle's alarm, put the PATS programmed key in the ignition and turn the key to the "on" position. Press the override button.

SOLVED: How to bypass factory anti theft on 1998 ford - Fixya

Answer: Anti theft system had been activated, you need to push the 7/8 9/0 keypad buttons at the same time then enter the unlock code to disable the system. Sometimes this can also work by using the door key to first lock the drivers door then unlock it.

Anti-theft light is blinking and won't start - 1997-2002 ...

How to Disable Anti-Theft on a Ford. Press the unlock button on your vehicle's key fob to deactivate the alarm. If you've misplaced your remote for the car, use the PATS programmed key to unlock the driver's side door. Then, put the key in the ignition and turn the key to the "on" position.

How to Disable Anti-Theft in Vehicles | It Still Runs

OBD II fault code P1260 is a manufacturer specific code that is defined by carmaker Ford as "THEFT Detected- Vehicle Immobilized", and is set when the PCM (Powertrain Control Module) detects a violation of the PATS (Passive Anti-theft System) security protocols, which has disabled the engine. On Ford applications, the PATS system communicates with the PCM via the instrument cluster, and depending on the signals received from the instrument cluster, the PCM will either disable the engine ...

P1260 - Theft Detected Vehicle Immobilized (Ford ...

If the anti-theft system has locked up your engine, you won't be able to start it. You'll have to disable it with these steps. Step 1: Check for the anti-theft light. It's located on your dash and will have a blue or red light. Step 2: Turn the ignition to the "on" position. Insert the key into the ignition and turn it to the on position, which activates your accessories but not the engine.

How to Shut Off the Anti-Theft Device in Your Car ...

I was able to solve the issue with the fords anti theft issue that was causing the no start.

Ford Explorer Anti Theft Issue Solved! - YouTube

The key has to match the vehicle in order to pass the anti-theft system test, and if it doesn't, the vehicle will never run. Try using a different key, and try locking with the key fob, and unlocking the door with the key in both the driver and passenger side. doors, as well as the trunk. This may allow the vehicle security system to stand down.
