Two decades after the democratic transition, South African universities are in turmoil. Whilst the old is slowly becoming unhinged, reimagining the new is protracted and contested. The challenges ahead, including a funding crunch, are formidable and bear the imprint of South African postcolonial specificities and global transformations in higher education. At this moment, critical and engaged socio-historical scholarship is indispensable. Transformation and Legitimation in Post-apartheid Universities: Reading discourses from Reitz is such a work. Revisiting the notorious Reitz incident of 2008, when a satirical video made by students from the University of the Free State (UFS) to register their resistance to the racial integration of black' students into historically white' residences became public, the text offers an analysis of the broader cultural and socio-political context that constituted the conditions of possibility for the incident and its aftermath. Attention is shifted from the principal actors in the original drama a handful of students and workers to a critical interrogation of the broader structures, positions, discourses and practices that fed into the Reitz incident', reaching into the present with violent and racially-charged student and worker protests in 2016. Van der Merwe and Van Reenen deliver a theoretically-rich analysis of the anatomy of current contestations about race and transformation in higher education in South Africa, the resultant legitimation crisis facing the UFS and South African universities more generally, as well as ways to restore institutional legitimacy and reputation, focusing on instituting deeper, more durable change that unlocks the promise of democracy. Dr Irma du Plessis University of Pretoria

Knowledge can and does enable, specifically through engagement between higher education institutions, the third sector (mostly non-profit organisations), public service role players and the communities. The purpose of the research is reciprocal building, sharing and utilisation of knowledge for mutual enablement and capacity building.

In 1977, Johnson's best selling *How Long Will South Africa Survive?* offered a controversial and highly original analysis of the survival prospects of apartheid. Now, after more than two decades of the ANC in government, he believes the question must be posed again. "The big question about ANC rule," Johnson writes, "is whether African nationalism would be able to cope with the challenges of running a modern industrial economy. Twenty years of ANC rule have shown conclusively that the party is hopelessly ill equipped for this task. Indeed, everything suggests that South Africa under the ANC is fast slipping backward and that even the survival of South Africa as a unitary state cannot be taken for granted. The fundamental reason why the question of regime change has to be posed is that it is now clear that South Africa can either choose to have an ANC government or it can have a modern industrial economy. It cannot have both."

Explore the game-changing technology that allows mobile learning to effectively reach K-12 students *Mobile Learning: A Handbook for Developers, Educators and Learners* provides research-based foundations for developing, evaluating, and integrating effective mobile learning pedagogy. Twenty-first century students require twenty-first century technology, and mobile devices provide new and effective ways to educate children. But with new technologies come new challenges—therefore, this handbook presents a comprehensive look at mobile learning by synthesizing relevant theories and drawing practical conclusions for developers, educators, and students. Mobile devices—in ways that the laptop, the personal computer, and netbook computers have not—present the opportunity to make learning more engaging, interactive, and available in both traditional classroom settings and informal learning environments. From theory to practice, *Mobile Learning* explores how mobile devices are different than their technological predecessors, makes the case for developers, teachers, and parents to invest in the technology, and illustrates the many ways in which it is innovative, exciting, and effective in educating K-12 students. Explores how mobile devices can support the needs of students Provides examples, screenshots, graphics, and visualizations to enhance the material presented in the book Provides developers with the background necessary to create the apps their audience requires Presents the case for mobile learning in and out of classrooms as early as preschool Discusses how mobile learning enables better educational opportunities for the visually impaired, students with Autism, and adult learners. If you're a school administrator, teacher, app developer, or parent, this topical book provides a theoretical, well-researched discussion of the pedagogical theory and mobile learning, as well as practical advice in setting up a mobile learning strategy.

Will Racism ever end in America? Maybe, but if we only focus on the reduction of individual racism, like hate-speech and hate crimes, we will miss a huge piece of the puzzle. Many of the obstacles people of color face today are caused by the less-discussed concept of institutional racism. Institutional racism is the idea that many of our most powerful institutions promote oppression by targeting qualities that correlate with racial identity and disproportionately disadvantage people of color. We will not be successful in the fight against injustice until we reform all institutions that help it thrive. In this book, students will learn what institutional racism is, what areas of life are most impacted by it, and what movements are fighting for its eradication.

This ground-breaking collection of essays outlines and explains the unique development of Latin American jurisprudence. It introduces the idea of the *Ius Constitutionale Commune en América Latina* (ICCAL), an original Latin American path of transformative constitutionalism, to an Anglophone audience for the first time. It charts the key developments that have transformed the region and assesses the success of the constitutional projects that followed a period of authoritarian regimes in Latin America. Coined by scholars who have been documenting, conceptualizing, and comparing the development of Latin American public law for more than a decade, the term ICCAL encompasses themes that cross national borders and legal fields, taking in constitutional law, administrative law, general public international law, regional integration law, human rights, and investment law. Not only does this volume map the legal landscape, it also suggests measures to improve society via due legal process and a rights-based, supranational and regionally rooted constitutionalism. The editors contend that with the strengthening of democracy, the rule of law, and human rights, common problems such as the exclusion of wide sectors of the population from having a say in government, as well as corruption, hyper-presidentialism, and the weak normativity of the law can be combated more effectively in future.

The book provides a rich, informative picture of the current state of student engagement evaluation, while also highlighting challenges and opportunities for future advances. A particular strength of this publication is its emphasis on the importance of taking evidence-based decisions, and showing how the South African Survey of Student Engagement (SASSE) can provide the evidence for well-informed changes in policy and practice in order to enhance student success." - Prof Magda Fourie-Malherbe, Stellenbosch University

Combining an overview of the interdisciplinary literature with original case studies, this volume examines Australian education through the lens of secularisation, from 1910 to the present, questioning the nature of "secular settlements" and the role of Christianity in Australian schools.
