variety of organizations. This role involves server-side operations and troubleshooting tasks that support business-critical and development activities.

Linux Administrator Job Description - JobHero

One would think you could dispatch & in two articles. Turns out you can't. While the first article dealt with using & at the end of commands to push them into the background and then diverged into explaining process management, the second article saw & being used as a way to refer to file descriptors, which led us to seeing how, combined with < and >, you can route inputs and outputs from ...
