Want a quick way to get your students happily conversing more in the target language? This practical book shows you how to use formative assessments to gain immediate and lasting improvement in your students' fluency. You'll learn how to:

- Embed the 3-minute formative assessment into every lesson with ease
- Engage students in peer formative assessment successfully
- Teach students to give each other formative feedback
- Help struggling students make significant gains
- Create and coach small groups for differentiated speaking practice
- Assist students in incorporating current grammar lesson into meaningful conversations
- Analyze your own use of language in the classroom to avoid vague feedback that can stifle student conversations
- Grade oral improvement positively

The authors provide formative assessments for 17 language functions with step-by-step lesson plans, aligned to ACTFL guidelines. Each plan includes a wealth of conversation and extension activities. There are ready-to-use checklists including the "I Can" log that helps students plot their own progress. Research has confirmed that when teachers use formative assessment, students can learn in six to seven months what would normally take a school year to learn. You'll find yourself using this book every day because of the gains your students will achieve in foreign language fluency.

Exploring the dynamics between victim and offender is paramount to answering important issues of character and vital for forensic research. This involves examining the role of the victim during and after victimization; this process is especially important for spousal violence because of the interactive process between the victim and the offender. *Forensic Psychology of Spousal Violence* covers the phenomenon of spousal violence and its different forms, discussing the consequences of abuse, providing research tips to be used in the field, including relevant case studies and much more. The innovative approach of this text fills a void in the current understanding of spousal violence. Uses international statistics to present data of women battered and/or deceased to educate, change mindsets and practices and ultimately reduce the number of battered women and spousal homicides in the future. Includes current case studies. Includes best practices for spousal abuse investigations. Portable for use in fieldwork.

"This course offers current and prospective teachers of English a comprehensive treatment of pronunciation pedagogy, drawing on both current theory and practice. The text provides: - an overview of teaching issues from the perspective of different methodologies and second language acquisition research - innovative teaching techniques - a thorough grounding in the sound system of North American English - insight into how this sound system intersects with spelling, morphology, listening, and discourse - diagnostic tools and assessment measures - suggestions for syllabus design. Discussion questions and exercises encourage teachers to draw on their personal language learning/teaching experience as they assimilate the contents of each chapter. A training cassette offers practice in assessing learners' pronunciation"--Publishers's website.

Your students need clear, complete answers to their questions about research, writing, and grammar and they often need them at a moments notice. As their teacher, you are their greatest resource, but you cant be available 24/7. For help with

work in class and at home and especially for questions at odd hours, students can turn to A Pocket Style Manual. The thoughtfully revised seventh edition makes it even easier for students to effectively and independently address their writing and research challenges. With 325 documentation models in four styles and coverage of drafting thesis statements, writing correctly and effectively, finding and evaluating sources, and writing research papers, A Pocket Style Manual supports writers across the disciplines.

O presente Manual inscreve-se no quadro de uma pedagogia que considera a iniciação à investigação como um elemento fundamental do processo de ensino/aprendizagem, determinante para a motivação dos alunos e, ao mesmo tempo, garantia da renovação do saber e da descoberta de respostas para os desafios e interrogações do futuro. Podemos apontar como intenção primeira, suscitar no leitor uma compreensão efetiva da natureza, objetivos, métodos e resultados da investigação qualitativa, mediante informação suficiente, rigorosa, atualizada e crítica. Nesse sentido não deixamos de colocar o leitor, ainda que de modo breve e introdutório, perante os fundamentos epistemológicos que subjazem a uma opção pela investigação qualitativa. E uma vez que a nossa proposta se dirige, muito em especial, à investigação do fenómeno educativo, quisemos partir, também, de uma visão complexa desse mesmo fenómeno. Enfim, apostámos na construção de um texto que ajude os seus leitores a empenharem-se num processo investigativo de natureza qualitativa, através do desenho de um plano de investigação adequado ao problema formulado (em termos de estratégia geral, de técnicas de recolha e de análise de dados), e que patenteie preocupação pela validação da mesma e pelos aspetos éticos em jogo.

The processing of pork is a common technological practice that modifies the taste, flavor, texture and color of raw pork meat. Due to pork's accessible price and versatility, the manufacture of pork products to offer a variety of options to consumers is an important strategy of the meat industries in this sector to improve profits and expand into new markets at the local, regional and international levels. The diversity of pork products reflects the diversity and history of many local cultures around the world, as well as a growing interest in preserving traditional processing practices. Pork: Meat Quality and Processed Meat Products delves into the various kinds of pork and the methods used to prepare it for consumption, including fresh meat products, fermented sausages, dry-cured products, blood sausages and cooked sausages. Each category starts with a specific raw material (entire cut vs. minced pork meat) to which is added a unique combination of ingredients (e.g., sodium chloride, starter cultures, blood, seasoning and spices). The method of processing (such as salting, drying, thermal processing and fermenting) takes consumer tastes and storage needs into account, as well as how each product will be consumed (cooked, sliced, spread and as an ingredient in other dishes, for instance). Consequently, a wide range of products made from pork are currently being produced worldwide. Added to this is the increasing importance of ingredients and health factors to consumers; the resulting demand for products that address specific health concerns is having a significant impact on research into and the production of pork meat products. Key Features: Comprehensively presents and discusses the wealth of information about pork products Includes specific details about the processing, quality

of final products and innovation in the industry Presents innovative, health-oriented approaches to making traditional and commercial pork products Discusses healthier pork meat products that address consumer trends and government recommendations The production of health-oriented pork products is an emerging and promising investigation area with a direct impact on the current market for meat products.

This book gathers selected papers presented at the 2020 World Conference on Information Systems and Technologies (WorldCIST'20), held in Budva, Montenegro, from April 7 to 10, 2020. WorldCIST provides a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences with and challenges regarding various aspects of modern information systems and technologies. The main topics covered are A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.

This volume contains the Proceedings of MUSME 2014, held at Huatulco in Oaxaca, Mexico, October 2014. Topics include analysis and synthesis of mechanisms; dynamics of multibody systems; design algorithms for mechatronic systems; simulation procedures and results; prototypes and their performance; robots and micromachines; experimental validations; theory of mechatronic simulation; mechatronic systems; and control of mechatronic systems. The MUSME symposium on Multibody Systems and Mechatronics was held under the auspices of IFToMM, the International Federation for Promotion of Mechanism and Machine Science, and FelbIM, the Iberoamerican Federation of Mechanical Engineering. Since the first symposium in 2002, MUSME events have been characterised by the way they stimulate the integration between the various mechatronics and multibody systems dynamics disciplines, present a forum for facilitating contacts among researchers and students mainly in South American countries, and serve as a joint conference for the IFToMM and FelbIM communities.
