The only limit from the MFP itself is the capability of the MFP to display a user interface to the workings of the application. As many of the applications are based around custom printing, scanning and authentication requirements, the MFP manufacturers that use this method gravitate towards these core technologies in the user interface.

A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you 're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Summary: "Malaysia's former Prime Minister Mahathir Mohamad is often seen as the sole author of the country's foreign policy. Malaysian Foreign Policy in the Mahathir Era shows that while Mahathir's personality, leadership style, political ideology and brand of nationalism unquestionably had a deep impact, so too did domestic issues and external forces associated with globalization. The book examines seven major foreign policy initiatives of the Mahathir period: Buy British Last, Anti-Commonwealth, Look East, Third World Spokesmanship, Regional Engagement, Islamic Posturing and Commercial and Developmental Diplomacy. In discussing these topics, the author explains the significance for foreign policy of communal concerns, the regime's need to maintain its own authority in the face of political and social initiatives (some rooted in Islam), and its desire to achieve national development. He also discusses external pressures, including Japan's regional designs, Singapore's defense posture and the growing importance of China for the region. The approach breaks away from the elitist decision making styles and single factor models usually employed to explain the foreign policy of developing nations, and establishes a direct link between domestic politics and foreign policy during the period studied, suggesting that the latter was truly an extension of the former."--Publisher description.
