MORI SEIKI - MV 40 A

The early Mori's had 2 types  
of tool changers, the MV  
Junior and MV 40 had a small  
AC motor that drove the ATC  
(this is the one with the  
main arm held on the shaft  
with locking rings and once  
the screws were loose, you  
did need to "shock" the main  
arm loose from the shaft),  
the MV35, MV45, etc. had a

# Online Library Mori Seiki

## Mv 40

hydraulically driven ATC, NO MOTOR OF ANY KIND. and the main arm is "splined" to the shaft (no adjustment there).
