learn to identify multiples and factors, including finding all factor pairs of a number, common factors of 2 numbers, and prime numbers. They will solve increasingly complex problems. The key words for this section are common factor, factor, and factor pair.

Multiplication & division in Year 5
(age 9–10) | Oxford Owl

Multiplication and division are two of the most important elements of maths learning for Year 5 children (ages 9-10). As skills, they have many practical uses - from paying for shopping to telling the time. And mastering those skills will enable your child to tackle a wide range of other maths topics, including fractions, percentages and algebra.

Ages 5 - 11 - Multiplication and
Division Multiplication and division ,
along with addition and subtraction ,
are two of the most common and
useful types of sum used in maths.
These multiplication wheels are an
easy way to introduce the topic of
multiplication, and this division by
sharing exercise is an easy way to
explain dividing.

Multiplication and Division - Maths - Parents - Page 3

To get to zero, you must minus 4 five
times, so $20/4 = 5$. Short division -
also known as the bus stop method,
this involves dividing the units
separately and carrying over the
remainder. Long division - similar to
short division, but use when dividing
large numbers by 2 digits or more.

Your child will learn that when they
are multiplying numbers, they get the
same product no matter what order
they multiply the numbers. This
means that multiplication is
commutative. For example: $10 \times 5 = 50$. $5 \times 10 = 50$. Your child will learn
that the order of the numbers does
matter when using division.
