Nikon D90 Automatic Exposure Mode Quick Guide. By Julie Adair King. Part of Nikon D90 For Dummies Cheat Sheet. Use this table for quick explanations of your Nikon D90 digital camera's fully automatic exposure modes, including Auto and the six Digital Vari-Program scene modes. These modes let you choose automatic or manual focusing, but limit your control over most other picture-taking settings.

Nikon D90 Automatic Exposure Mode Quick Guide - dummies

These four advanced exposure modes on your Nikon D90 let you adjust aperture (f-stop) to manipulate depth of field (the zone of sharp focus) and shutter speed to give moving objects a sharp focus or a blurry appearance. You also have access to picture options not available in Auto or Digital Vari-Program scene modes. AddThis Sharing Buttons.

Guide to Nikon D90 Advanced Exposure Modes - dummies

Guide to Nikon D90 Advanced Exposure Modes. These four advanced exposure modes on your Nikon D90 let you adjust aperture (f-stop) to manipulate depth of field (the zone of sharp focus) and shutter speed to give moving objects a sharp focus or a blurry appearance. You also have access to picture options not available in Auto or Digital Vari-Program scene modes.

Nikon D90 For Dummies Cheat Sheet - dummies

I spent days to understand and implement Auto Exposure Lock feature and I feel like it is worth to share with you all so that you don't have to spend much of your time. Although the idea is same for every DSLR camera, I am taking reference of Nikon D90 for the menu settings and have included couple of photographs I have taken with my D90. If ...

Auto Exposure Lock (AE-L) With Nikon D90 — Daily ...

b1 EV steps for exposure control top. This defaults to 1/3 stops. You may set half stops if you prefer. The D90 sets exposure steplessly, regardless of this setting. Missing: 1 use the full-stop setting of the D300, D700 and D3, missing in the D90. Design Flaw: Ideally Nikon would provide separate settings for manual and auto exposure. I'd set 1/3 stops for manual exposure and full stops in auto exposure (P, S and A modes).

Nikon D90 Custom Menu: Metering/exposure

Nikon D90 allows you to shoot 2 frames over exposed and one correctly exposed (+2F) or 2 frame under exposed and one correctly exposed (-2F) or traditional 3F which gives one under exposed, one correctly exposed and one over exposed picture. So the maximum number of frames for Nikon D90 is 3.

How To Setup Automatic Exposure Bracketing (AEB) — Daily ...

Nikon D90 Exposure Modes The mode dial on the right side of the D90's top panel provides access to its various exposure modes, the same arrangement of Auto, three semi-auto, and one Manual as found...

Nikon D90 Review - Modes & Menus - Imaging Resource

It's a same thing as you press the ISO button on the back of your D90 and rotate main command dial. In Nikon D90, ISO can be set to AUTO which lets camera pick ISO value automatically as necessary or you can also manually set any value that ranges from LO 1 (equivalent to ISO 100) through 3200 to HI 1 (equivalent to ISO 6400).

Using ISO Settings With Nikon D90 — Daily Photography Tips

Shooting modes fall into three categories: auto, scene, and P, S, A, and M modes. In auto and scene modes the camera controls shutter speed and aperture. P, S, A, and M modes are known as exposure modes and give photographers a choice as to which elements of exposure—aperture or shutter speed—they wish to control.

P, S, A, and M Modes (Exposure Modes) - Nikon

New on the D90 is the option to select how many exposures are made. The default is one, and you may choose up to 9. c4 Monitor-off delay top This sets how long the rear LCD stays lit.

Nikon D90 Custom Settings: timers and AE/AF lock

A Mode: Aperture Priority . In A mode you choose the Aperture and the D90 chooses the shutter speed. S Mode: Shutter Priority . In S mode you set the Shutter and the D90 sets the aperture. If the D90 runs out of good apertures you easily can get under or over exposure in S mode: watch that the D90 can select a correct aperture for your lighting.

Nikon D90 Top Panel - Ken Rockwell

I have had a Nikon D90 for two and a half years now, and I have been very pleased with my purchase. Due to many many jobs and chores lately, I hadn't used it, until today. It's a sunny day today and when I actually got out of my house and took a few show in Auto settings (yes, I know auto is not the answer to everything and manual shooting ...

nikon - Overexposed shots on a sunny day with Auto ...

When you select this mode, you can select the focus point but the D90 can use other focus points as well if the subject moves. This mode is the best option for capturing moving subjects. 3. Auto-area. This is default mode for Nikon D90 where camera selects the focus point for you automatically. I use this mode most of the time and works great.

Nikon D90 Autofocus Area Mode — Daily Photography Tips

If you prefer to force the D90 to focus with just one specific sensor, go to MENU > Custom Setting Menu > a Autofocus > a1 AF-area mode and select Single Point. You can force the D90 into AF-S focus mode with the top switch, but you don't need to. It will lock anyway for still subjects in the default AF-A mode. Moving things, like kids

Nikon D90 Autofocus Settings - Ken Rockwell

This is Long Exposure Dark-Frame Subtraction Noise Reduction. OFF. Default. Leave it here. ON. Don't use this. If you do, the D90 will double the amount of time you have to wait around for longer time exposures. The D90 is so good you don't need this. Nikon only includes this because old-timers would get peeved if it was missing.

Nikon D90 Shooting Menu - Ken Rockwell

In a new wrinkle, the Nikon D90 has only one autofocus mode in Live View, and it's not the traditional phase-detect AF. The D90's only option for autofocus in Live View mode is contrast detection....

Nikon D90 Review - Live View - Imaging Resource

Comprehensive exposure control: Five advanced scene modes plus Program Auto, Shutter Priority, Aperture Priority and Manual. Auto Active D-Lighting: Selectable and Automatic, Active D-Lighting optimizes details within shadows and highlights, taming high-contrast situations in real time.

D90 | Nikon

For indoor portraits, shoot using available light rather than flash for softer illumination and no red-eye. In the A exposure mode, simply keeping the built-in flash unit closed disables the flash. In Portrait mode, hold the Flash button down as you rotate the main command dial to select the Off setting.
