Jason, like many people, is an addict. His addiction doesn't center on any drug or alcohol. He's a pornography and masturbation addict, and the insidious nature of his addiction erodes his self-worth, his relationships, and his career. Jason meets David at a twelve-step meeting, where David offers him a new approach to treating pornography addiction. Through a series of meetings, David guides Jason as he successfully overcomes his addiction, a process supported by glimpses into Jason's family and how his relationships improve as pornography loses its hold on his life. Jason's story is fictional. The treatment plan he follows is very real. Designed by author and pornography addiction treatment expert Brian Brandenburg, the strategies found in *Power over Pornography* are praised by those who, having taken part in Brandenburg's program, now pursue lives free of pornographic viewing. Brandenburg's innovative treatment plan comes at a crucial moment in the fight against pornography and masturbation addiction. A generation of Internet-savvy children has grown up with access to pornography, quite literally, at their keyboard-typing fingertips. The images and videos they view online are far more graphic than their parents can imagine. Now the children of this generation have become young adults, with many addicted to the instant gratification of pornography. Like Jason, most pornography and masturbation addicts are male, but women are also afflicted. Maintaining normal, healthy relationships becomes almost impossible while in the grip of pornography. Anxiety and guilt over your actions worsen into clinical depression and self-loathing. Work productivity suffers, and an addict with on-the-job access to the Internet is always a few mouse clicks away from job termination and scandal. Jason and others in his situation are discovering traditional twelve-step programs don't address key aspects of pornography and masturbation addiction. Brandenburg's radical treatment takes a new, often counterintuitive approach to overcoming pornography addiction. His advice sometimes contradicts traditional strategies, but his system works. A comprehensive, easy-to-understand approach to pornography addiction treatment, *Power over Pornography* appeals to all readers. You can overcome your addiction. Let Brian Brandenburg and Jason be your guides.

Comprehensive and up-to-date, the text integrates major construction management topics with an explanation of the methods of heavy/highway and building construction. It incorporates both customary U.S. units and metric (SI) units and is the only text to present concrete formwork design equations and procedures using both measurement systems. This edition features information on new construction technology, the latest developments in soil and asphalt compaction, the latest developments in wood preservation and major health, safety and environmental concerns.Explains latest developments in soil and asphalt compaction. Presents the latest developments in wood preservation materials and techniques which respond to environmental concerns. Expanded and updated coverage of construction safety and major health hazards and precautions. Designed to guide construction engineers and managers in planning, estimating, and directing construction operations safely and effectively.

This book addresses one of the most crucial and common questions confronting planners of languages other than English, that is, how the impacts of global languages on local languages should be dealt with: internationalization or local language promotion? This empirical study examines the implementation of Iran's governmental language and terminology policy to accelerate rarely used abbreviation methods in Persian in order to preserve the language from the extensiveness of borrowed English abbreviated forms. This book provides an in-depth analysis of relevant linguistic theories as well as the structure and social context of the Persian language itself, rather than relying on personal opinions or beliefs either in favour of or against abbreviation. The text appeals to politicians, language planners, terminologists, lecturers, authors and translators of scientific works, especially those who are speakers of languages other than English and seek to promote their local languages. This book is particularly relevant to linguistics students (both undergraduate and graduate students) and language teachers and researchers in the broader areas of language education and curriculum design.
