America is being held back by the quality and quantity of learning in college. Many graduates cannot think critically, write effectively, solve problems, understand complex issues, or meet employers' expectations. The only solution - making learning the highest priority in college - demands fundamental change throughout higher education.

"The economics of American higher education are driven by one key factor--the availability of students willing to pay tuition--and many related factors that determine what schools they attend. By digging into the data, economist Nathan Grawe has created probability models for predicting college attendance. What he sees are alarming events on the horizon that every college and university needs to understand. Overall, he spots demographic patterns that are tilting the US population toward the Hispanic southwest. Moreover, since 2007, fertility rates have fallen by 12 percent. Higher education analysts recognize the destabilizing potential of these trends. However, existing work fails to adjust headcounts for college attendance probabilities and makes no systematic attempt to distinguish demand by institution type. This book analyzes demand forecasts by institution type and rank, disaggregating by demographic groups. Its findings often contradict the dominant narrative: while many schools face painful contractions, demand for elite schools is expected to grow by 15+ percent. Geographic and racial profiles will shift only slightly--and attendance by Asians, not Hispanics, will grow most. Grawe also use the model to consider possible changes in institutional recruitment strategies and government policies. These "what if" analyses show that even aggressive innovation is unlikely to overcome trends toward larger gaps across racial, family income, and parent education groups. Aimed at administrators and trustees with responsibility for decisions ranging from admissions to student support to tenure practices to facilities construction, this book offers data to inform decision-making--decisions that will determine institutional success in meeting demographic challenges"--

"[A] stunning tale of academic fraud . . . shocking and compelling."-The Washington Post Dave Tomar wrote term papers for a living. Technically, the papers were "study guides," and the companies he wrote for-there are quite a few-are completely aboveboard and easily found with a quick web search. For as little as ten dollars a page, these paper mills provide a custom essay, written to the specifics of any course assignment. During Tomar's career as an academic surrogate, he wrote made-to-order papers for everything from introductory college courses to Ph.D. dissertations. There was never a shortage of demand for his services. The Shadow Scholar is the story of this dubious but all-too-common career. In turns shocking,

absurd, and ultimately sobering, Tomar explores not merely his own misdeeds but the bureaucratic and cash-hungry colleges, lazy students, and even misguided parents who help make it all possible.

University as an Institution Today

Writing about Learning and Teaching in Higher Education offers detailed guidance to scholars at all stages-experienced and new academics, graduate students, and undergraduates-regarding how to write about learning and teaching in higher education. It evokes established practices, recommends new ones, and challenges readers to expand notions of scholarship by describing reasons for publishing across a range of genres, from the traditional empirical research article to modes such as stories and social media that are newly recognized in scholarly arenas. The book provides practical guidance for scholars in writing each genre-and in getting them published. To illustrate how choices about writing play out in practice, we share throughout the book our own experiences as well as reflections from a range of scholars, including both highly experienced, widely published experts and newcomers to writing about learning and teaching in higher education. The diversity of voices we include is intended to complement the variety of genres we discuss, enacting as well as arguing for an embrace of multiplicity in writing about learning and teaching in higher education.

For more than fifteen years, the manuscript editing department of the Press has overseen online publication of the monthly "Chicago Manual of Style" Q&A, choosing interesting questions from a steady stream of publishing-related queries from "Manual" users and providing thoughtful and/or humorous answers in a smart, direct, and occasionally cheeky voice. More than 28,000 followers have signed up to receive e-mail notification when new Q&A content is posted monthly, and the site receives well over half a million visitors annually. "But Can I Start a Sentence with But ? "culls from the extensive Q&A archive a small collection of the most helpful and humorous of the postings and provides a brief foreword and chapter introductions. The material is organized into seven chapters that cover matters of editorial style, capitalization, punctuation, grammar and usage, citation and quotation, formatting and other non-language issues, and a final chapter of miscellaneous items. Together they offer an informative and amusing read for editors, other publishing professionals, and language lovers of all stripes."

Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers.

Numerous studies have chronicled students lack of trust in large social institutions, declining interest in politics, and decreasing civic skills. This book is a comprehensive guide to developing high-quality civic engagement experiences for college students. The book defines civic engagement and explains why it is central to a college education. It describes the state of the art of education for civic engagement and provides guidelines for designing programs that encourage desired learning outcomes. In addition, the book guides leaders in organizing their institutions to create a campus-wide culture of civic engagement.

Is everything in a university for sale if the price is right? In this book, one of America's leading educators cautions that the answer is all too often "yes." Taking the first comprehensive look at the growing commercialization of our academic institutions, Derek Bok probes the efforts on campus to profit financially not only from athletics but increasingly, from education and research as well. He shows how such ventures are undermining core academic values and what universities can do to limit the damage. Commercialization has many causes, but it could never have grown to its present state had it not been for the recent, rapid growth of money-making opportunities in a more technologically complex, knowledge-based economy. A brave new world has now emerged in which university presidents, enterprising professors, and even administrative staff can all find seductive opportunities to turn specialized knowledge into profit. Bok argues that universities, faced with these temptations, are jeopardizing their fundamental mission in their eagerness to make money by agreeing to more and more compromises with basic academic values. He discusses the dangers posed by increased secrecy in corporate-funded research, for-profit Internet companies funded by venture capitalists, industry-subsidized educational programs for physicians, conflicts of interest in research on human subjects, and other questionable activities. While entrepreneurial universities may occasionally succeed in the short term, reasons Bok, only those institutions that vigorously uphold academic values, even at the cost of a few lucrative ventures, will win public trust and retain the respect of faculty and students. Candid, evenhanded, and eminently readable, *Universities in the Marketplace* will be widely debated by all those concerned with the future of higher education in America and beyond.
