Quick Reference Guides (QRGs) | EPA

Since the release of the first draft of the Next Generation Science Standards (NGSS), NSTA has been at the forefront in promoting the standards and helping science educators become familiar with and learning to navigate this exciting but complex document. Later, when the final version was released and states began adopting the standards, NSTA started to develop resouces that would assist educators with their implementation. Along the way, NSTA learned that even the simplest of resources, like a one-page cheat sheet, can be extremely useful. Many of those tools are collected here, including: a two-page "cheat sheet" that describes the practices, core ideas, and crosscutting concepts that make up the three dimensions described in A Framework for K-12 Science Education, an "Inside the Box" graphic that spells out all of the individual sections of text that appear on a page of the NGSS, a Venn diagram comparing the practices in NGSS, Common Core State Standards, Mathematics, and Common Core State Standards, English Language Arts, and matrices showing how the NGSS are organized by topic and disciplinary core idea. This guide also provides the appropriate performance expectations, disciplinary core ideas, practices, crosscutting concepts, connections to engineering, technology, and applications of science, and connections to nature of science. The book's emphasis is on easy. Find the parts of the standards most relevant to you, acquaint yourself with the format, and find out what each of the different parts means. Indispensible to science teachers at all levels, as well as to administrators, curriculum developers, and teacher educators.

Quick Reference Guides (QRGs) | EPA

Designed to promote reflection, discussion, and action among the entire learning community, Educating Everybody's Children encapsulates what research has revealed about successfully addressing the needs of students from economically, ethnically, culturally, and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies. Although good teaching works well with all students, educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds. Those tools and the knowledge base behind them are the foundation of this expanded and revised second edition of Educating Everybody's Children. Each strategy discussed in the book includes classroom examples and a list of the research studies that support it. The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers. We must ensure that all teachers are capable of delivering a standards-based curriculum that describes what students should know and be able to do, and that these standards are delivered by means of a rich and engaging "pedagogy of plenty." By these two acts we can ensure that all schools will be ready and able to educate everybody's children.

Noted pastor/teacher John MacArthur takes you through the key aspects of the Bible in this guide for students. For all 66 books, key doctrines, highlighted people, geographic, historical, and cultural background, cross references, how Christ is pictured, character/attributes of God, explanations of key words and interpretive challenges will be examined.In addition, the guide will include: "Why I Believe the Bible" How to interpret each type of literature Charts, timelines, maps "Where to Find It" index of favorite passages and key Bible events, stories, and teachings Doctrinal studies (concise, with references and brief explanations) Index of people in the Bible Topical Index "How to Study the Bible" article
