The District Cooling Guide provides design guidance for all major aspects of district cooling systems, including central chiller plants, chilled-water distribution systems, and consumer interconnection. It draws on the expertise of an extremely diverse international team with current involvement in the industry and hundreds of years of combined experience.

"Provides foundational guidance for improving energy performance (of envelope, space-conditioning, ventilation, water-heating, lighting, and plug-load systems) and indoor environmental quality and promotes best practices for designing, operating, and owning dwelling units and common spaces in low- to mid-rise multifamily residential buildings, including high-performance and zero energy buildings"--
