position, area,  
shape and size  
of things. •

Spatial

describes how  
objects fit  
together in  
space, on earth.

• Data are facts  
and statistics  
collected  
together for  
reference or  
analysis. •

Bookmark File

PDF Spatial

Spatial data are data that are connected to a place in the Earth.

Process Gis

Spatial analysis and modeling -

SlideShare

Spatial modeling is object-oriented with coverage and concerned with

# Bookmark File

## PDF Spatial

how the physical world works or looks. The resulting model represents either a set of objects or real-world process.

For example, spatial modeling can be used to analyze the projected path of tornadoes by

# Bookmark File

## PDF Spatial

layering a map with different spatial data, like roads, houses, the path of the tornado and even its intensity at different points.
