By this definition, a Mac computer is not a PC, as it is not IBM-compatible. PC is still an abbreviation for personal computer at times, however, in most cases it is referring to the IBM-compatible type of computer. While a Mac is considered a personal computer, it is not a "PC" in the specific sense that it doesn't run Microsoft Windows.

Is a Mac a PC?

One of the most popular Macintosh books ever written, *The Mac is not a typewriter* has been called the "Strunk and White of typography." Best-selling author Robin Williams's simple, logical principles for using type to produce beautiful, professional documents are as true now as they were when the original edition was published in 1989. This updated edition includes new examples and expanded information dedicated to the practical advice that made the first edition an enduring bestseller.

~~The Mac is Not a Typewriter, 2nd Edition: Williams, Robin ...~~

In the strictest definition, a Mac is a PC because PC stands for personal computer. However, in everyday use, the term PC typically refers to a computer running the Windows operating system, not the operating system made by Apple.

~~What's the Difference Between a Mac and a PC?~~

Updated Many Mac users today found, to their surprise, they are unable to print to their HP Inc printers.. This is due to a code-signing snafu affecting macOS Catalina (version 10.15) and Mojave (10.14), specifically. HP's printer driver software is cryptographically signed with a certificate that macOS uses to determine whether the application is legit and can be trusted.

A media access control address is a unique identifier assigned to a network interface controller for use as a network address in communications within a network segment. This use is common in most IEEE 802 networking technologies, including Ethernet, Wi-Fi, and Bluetooth. Within the Open Systems Interconnection network model, MAC addresses are used in the medium access control protocol sublayer of the data link layer. As typically represented, MAC addresses are recognizable as six groups of two
