Schon's theory of reflective practice was developed in his seminal book 'The Reflective Practitioner: How Professionals Think in Action', first published in 1983 and then republished in 1991. Unlike Kolb's (1984) reflective theory, Schon's theory is not a multi-stage or circular model of reflection.

*The reflective practitioner - SOPPER.DK*

Reflection is the process of making sense of an experience in order to learn and improve as a practitioner. 1 Often, we reflect as part of our everyday practice without being aware that we are doing it - for example, on the way home from work. Using reflection within health and social care has benefits for patients and the profession. In order to do this effectively, reflection involves describing, analysing and evaluating experiences from practice in a way that helps you make sense of it.

Reflective practice is the ability to reflect on one's actions so as to engage in a process of continuous learning. According to one definition it involves "paying critical attention to the practical values and theories which inform everyday actions, by examining practice reflectively and reflexively. This leads to developmental insight". A key rationale for reflective practice is that experience alone does not necessarily lead to learning; deliberate reflection on experience is essential. Refle

The best professionals, Donald Schön maintains, know more than they can put into words. To meet the challenges of their work, they rely less on formulas learned in graduate school than on the kind of improvisation learned in practice. This unarticulated, largely unexamined process is the subject of Schön's provocatively original book, an effort to show precisely how 'reflection-in-action' works and how this vital creativity might be fostered in future professionals.
