The Defiant was designed and built by Boulton Paul Aircraft as a "turret fighter", without any forward-firing guns, also found in the Blackburn Roc of the Royal Navy. In combat, the Defiant was found to be reasonably effective at destroying bombers but was vulnerable to the Luftwaffe's more manoeuvrable, single-seat Messerschmitt Bf 109 fighters. The lack of forward-firing armamen

The turret fighter was predicted by many before World War II to be the only effective way of dealing with the new threat of the heavy bomber. In the event, a two-man fighter with its armament concentrated in a power-operated turret did not turn out to be the answer. The Boulton Paul Defiant and the Blackburn Roc were only two examples of the concept to enter service and only the Defiant was able to claim any success in combat.

{detailed description}The Boulton Paul Defiant and Blackburn Roc turret fighters were the tangible results of a concept that flowered in the mid-1930s, in response to the fear of attacks by the new generation of all-metal monoplane bombers. 'Bomber destroyers' with all their guns in power-operated turrets seemed to many people to be the only answer to this threat. The concept, as old as armed ...

The turret fighter was designed as a bomber destroyer in the era when the belief that bombers would get through in escorted and therefore need a special aircraft to destroy them. This book details the deployment and service history and it was not quite the disaster I imagined in daytime and the units deploying it had practiced being intercepted single seater fighters forming self protecting circles.

~~**[eBooks]-The Turret Fighters-Defiant-And-Roc**~~

The Blackburn B-25 Roc was a British Second World War-era Fleet Air Arm fighter aircraft designed by Blackburn Aircraft Ltd. It took its name from the mythical bird of the tales of the Arabian Nights, the Roc. Derived from the Blackburn Skua and developed in parallel, the Roc had its armament in a turret. The Roc came to be viewed as inferior to existing aircraft such as the Skua and the type had only brief front-line service.
