The integration of the 3rd dimension in the production of spatial representation is largely recognized as a valuable approach to comprehend our reality, that is 3D. During the last decade developments in 3D Geoinformation (GI) system have made substantial progress. We are about to have a more complete spatial model and understanding of our planet in different scales. Hence, various communities and cities offer 3D landscape and 3D city models as valuable source and instrument for sustainable management of rural and urban resources. Also municipal utilities, real estate companies benefit from recent developments related to 3D applications. In order to present recent developments and to discuss future trends, academics and practitioners met at the 7th International Workshop on 3D Geoinformation. This book comprises a selection of evaluated, high quality papers that were presented at this workshop in May 2012. The topics focus explicitly on the last achievements (methods, algorithms, models, systems) with respect to 3D GeoInformation requirements. The book is aimed at decision makers and experts as well at students interested in the 3D component of geographical information science including GI engineers, computer scientists, photogrammetrists, land surveyors, urban planners, and mapping specialists.

The speechwriter for George W. Bush presents interviews and sensitive details about the terrorist acts prevented due to enhanced interrogation methods, and describes how those efforts are hampered by Barack Obama's administration.

Bachelor Thesis from the year 2019 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, Sultan Moulay Sliman University (Faculty of Arts and Humanities Beni Mellal), course: English literary and cultural studies, language: English, abstract: This study aimed at studying the use of Facebook in the promotion of tourism in Beni Mellal Khenifra region. Nowadays, Social media is increasingly being adopted by destination marketing organizations. Hence, this study was guided by two research questions: first, does Facebook influence travelers' decisions while considering a destination? Second, to what extent are Beni Mellal Khenifra's tourism organizations present on Facebook? Accordingly, in order to attain the objectives of the study, the researcher used a descriptive analytical research design. In this regard, in order to collect quantitative data, a questionnaire was administered to 250 travelers who have visited the region of Beni Mellal Khenifra. However, the sample size was comprised of only 60 respondents because many travelers refused to fill it in, while others didn't see the messages at all for it was administered online through Facebook and Instagram. The findings pointed out that Facebook significantly impacts travelers' decisions while considering a destination as 71% of the respondents use this social networking platform for travel related purposes. Moreover, concerning the second research question, the results of the study revealed that Beni Mellal Khenifra's tourism organizations are not sufficiently present. This was rationalized by the fact that 72% of the respondents stated that they have never been exposed to travel related content on Facebook generated by these organizations. Ultimately, the study recommended that tourism authorities must raise awareness towards the important role of new technologies especially social media in the promotion of tourism. Moreover, the researcher suggested that the government should pr
