Using And Constructing A Classification Key Answers

Construction is a general term meaning the art and science to form objects, systems, or organizations, and comes from Latin constructio (from com-"together" and struere "to pile up") and Old French construction. To construct is the verb: the act of building, and the noun is construction: how something is built, the nature of its structure. In its most widely used context, construction covers ...

Construction - Wikipedia

Text classification is a common task in natural language processing (NLP) which transforms a sequence of text of indefinite length into a single category. One theme that emerges from the above examples is that all have a binary target class. For example, either the comment is toxic or not toxic, or the review is fake or not fake.
