Water travels by different processes of evaporation, condensation, precipitation, infiltration, runoff and subsurface flow. When these processes occur water goes through different phases such as: liquid, solid and gas. Hydrologic cycle involves the exchange of heat energy, which leads to temperature changes.

Water Cycle - Free Essay Examples and Research Papers

The water cycle is a process in which water switches its state between the three different phases, namely solid, liquid and gas. And then further the water cycle includes circulation between the earth's surface, water bodies and the atmosphere. The basic driving force of the water is the sun (Hughes 12-19). The water cycle is of immense importance as it helps to regulate the temperature of the earth surface and also helps in bringing rainfall to various parts of Earth..

Water Cycle is an international and interdisciplinary open access journal that publishes top-tier original research in all areas of water cycles, including meta-cycles. It examines their relationship to science, technology, society, economics, health, culture, policy, regulation and strategy.

~~Water Cycle Journal - KeAi~~

WaterCycle Term Paper: Water cycle is the constant process of circulation of water about the Earth which occurs under the effect of sunlight and gravitation. More than $\frac{3}{4}$ of the surface of the Earth is covered with water and the absolute quantity of the world ocean is the salty sea water, while the pure fresh water (without which the life is impossible) occurs in little quantities on the continents and islands which possess rivers, swamps, underground water and lakes.

~~Term Paper on Water Cycle | YourTermPapers.com~~

The Water Cycle. The earth has a limited amount of water. That water keeps going around and around and around in what we call the "Water cycle". It is the only way that Earth can be continually supplied with fresh water. The sun is the most important part of renewing our water supply. It can be solid (ice), a liquid (water), or gas (water vapor).

~~"Water Cycle Essay" Essays and Research Papers~~

Water is transported endlessly throughout the various components of the Earth's climate system, affecting every component along the way. Clouds and water vapor in the atmosphere influence the...
